Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, drawn to a clip and irrigation hose assembly, classified in class 138, subclass 107.
- II. Claims 7 and 8, drawn to a method of making a clip and irrigation hose assembly, classified in class 29, subclass 890.144.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the process as claimed can be used to make other and materially different product such as one not requiring right or left halves or a semicircular flange.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. During a telephone conversation with Mr. Michael L. Mau on June 18, 2002 a provisional election was made without traverse to prosecute the invention of group II, claims 7 and 8. Affirmation of this election must be made by applicant in replying to this

Office action. Claims 1-6 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Claim Objections

5. Claims 7 and 8 are objected to because of the following informalities: in claim 7, line 2, --an-- should be inserted before "irrigation" in order to properly recite the claim. Appropriate correction is required.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 7 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by McNeill (US Patent 5,743,300).

McNeill discloses a method of making a hook and irrigation hose assembly wherein a plurality of hooks are secured at spaced intervals on an irrigation hose by an automated process, the hooks and hose being coiled and able to be shipped to a site for subsequent installation by clipping the hooks to a wire, see column 2, lines 10-14 and 44-52.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
